## ER12-1400

## ER12-1400,

Maxium payload 12 kg with maxium reach 1391 mm.

## - Highlights

The ER12-1400 robot has a maximum load of 12 kg and an arm span of
1391 mm , which is characterized by a wide working range and strong load
capacity;
accuracy and d wrist design and control algorithm can improve the positioning
accuracy and dynamic performance of the robot. The repetitive positioning
3 The fully enclosed mechanical body is not only compact in structure, but also covers a small area of $260 \mathrm{~mm} * 260 \mathrm{~mm}$. It has high dust-proof and waterproof performance and secondary protection characteristics
for special applications.

- Applications
$t$ can be used for handling operations
machine tending), sorting, assembling
grinding, polishing, Arc welding etc.
grinding, polishing, Arc welding,

## - Industries

Suitable for PCB, 3C, plastic,
metal parts and other industries.
